

Information Technology Intern

Spectra Energy Corp (NYSE: SE), a *FORTUNE 500* company, is one of North America's leading pipeline and midstream companies. Based in Houston, Texas, the company's operations in the United States and Canada included more than 21,000 miles of natural gas, natural gas liquids and crude oil pipelines; approximately 300 billion cubic feet (Bcf) of natural gas storage; 4.8 million barrels of crude oil storage; as well as natural gas gathering, processing and local distribution operations. Spectra Energy has served North American customers and communities for more than a century.

Position Description

Spectra Energy Corporation will be implementing new and challenging business applications in 2015 and is seeking students to work in a real-world, high tech environment. This will be an opportunity to participate in the development and support of key business applications that utilize some of the latest information technology, gaining relevant knowledge and skills in your future career field, while learning more about the Spectra Energy Corporation IT Organization.

Job Responsibilities:

- Working in an environment where you will collaborate with others and continue to develop your skills and apply classroom learning in areas such as application development, network and database administration, system analysis and project management.
- Working with cutting edge technology to meet the ever changing needs and challenges of a FORTUNE 500 company in the energy sector.

Basic/ Minimum Qualifications

- Pursuing a degree in Management Information Systems, Computer Science or a related technical or business field.
- Minimum GPA 3.0.
- Junior or Senior standing.

Desired Qualifications

- Willingness to learn new technology and to accept new responsibilities.
- Motivated, self-starter with the ability to work independently as well as collaboratively in a team.
- Ability to effectively solve problems by using analytical skills to reach a logical conclusion.
- Demonstrates ability to interact well with others, strong organization, analytical and communication skills.
- Attention to detail and commitment to quality, customer service and team environment.
